Analysis: Zinc (Zn)..... 25.0%  
Sources: Zinc Sulfate, Citric Acid Chelate  
Bulk Density: Pounds per cubic foot ..... 80.0  
Particle Size: ..... powder/crystal

**PACKAGING:** ..... 25 pound poly bags

**SHIPPING LOCATION:** ..... Ozark, Alabama

### PRODUCT CONSIDERATIONS:

PRO•SOL Citric Acid Chelates are high quality soluble powders for use in foliar and liquid fertilization programs. PRO•SOL CACs offer dry products that are cost competitive to liquid chelates and eliminate the hassle of container disposal or storage tanks.

### DIRECTIONS FOR USE

Three-fourths pound of PRO•SOL Zinc CAC is equal to one quart of liquid 10% Zinc Chelate. Apply 1 - 2 pounds in solution as foliar spray per acre depending on zinc deficiency. Always add PRO•SOL Zinc CAC to the water first and then to the fertilizer. It is advisable to do a jar test before addition to any chemicals or large volume mixing. Concentrated chelate solutions can be made by dissolving 16 pounds of PRO•SOL Zinc CAC in 3 gallons of water.
